

Improve your bottom line with MW Security

EASECURE[®]LED

The patented EASECURE[®]LED is a highly flexible device that can be wrapped around large and bulky items such as Playstations, X-boxes, DVD players, computers TV,s, Plasma TV,s home cinema systems etc. The MW Security EASECURE[®]LED has a built-in active alarm sounding louder than any competitor 100dB+/5dB.

The alarm system works in 4 different ways; when the gates pick up the RF or AM alarm media from the EASECURE[®]LED. When the wires are cut, if someone tries to open the EASECURE[®]LED in an incorrect manner, and if someone tries to pull the EASECURE[®]LED off the product.

The alarm can be switched off by using the Sound Safer reset unit. When the alarm is active the LED light will flash.

About the products

MW Security products are made of high quality PC that is resistant, durable and clear. Our products are environmental friendly and fully recyclable, suitable for all retail sectors, excellent in visibility, reusable and adaptable for all EAS systems.
